SUMMARY

Motivated Full Stack Web Developer with strong knowledge of HTML, CSS, JavaScript, React, Node.js, Express.js, and MongoDB. Experienced in building responsive web applications, REST APIs, and full-stack projects. Successfully completed both frontend and backend development through a professional Full Stack Web Development course at Dice Academy Institute. Quick learner, punctual, and passionate about writing clean and scalable code.

EXPERIENCE

Full Stack Web Developer

Self-Initiated Project (Personal Project)   **January 2026 – January 2026**

· I developed a full-stack E-Commerce Clothing Website using **React.js, Tailwind CSS, Node.js, Express.js, and MongoDB**.
· The platform includes **role-based access** for Admin, Seller, and User. Admin can manage sellers and products, approve or block sellers, and control product visibility. Sellers can add, edit, and manage products with stock control after admin approval.
· Users can browse products, add items to cart, manage favorites, update cart quantities, and place orders using a checkout flow.
· I implemented **JWT-based authentication**, secure APIs, cart and order management, and responsive UI for all devices.
· The project was deployed using **Render (backend)** and **cloud hosting for frontend**, following real-world production practices.
· Enhanced website performance by implementing React.js hooks and code splitting, reducing component load times by 40% on a 150+ product catalog over a 6-month development cycle.
· Integrated real-time product availability updates and dynamic search using React.js Context API and Redux Toolkit, maintaining sub-200ms response times for catalogue queries during 6 months of development and improving user engagement across a 3-tier authorization system.

PROJECT

MERN Stack Mini Projects (Self-Initiated Project (Personal Project))

Self-Initiated Project (Personal Project) · ashutosh203.github.io/ecommerce-frontend/ · January 2026 – January 2026
· Built multiple mini applications using MongoDB, Express, React, and Node.js.
· Focused on CRUD operations, API handling, and frontend-backend integration.

E-Commerce Clothing Website

In which organization did you do E-Commerce Clothing Website? · ashutosh203.github.io/ecommerce-frontend/
· January 2026 – January 2026
· I independently designed and developed a full-stack E-Commerce Clothing Website where users can browse products, add items to cart, manage favorites, and place orders.
· I implemented secure authentication, role-based access for Admin and Seller panels, product and inventory management, cart and checkout functionality, and RESTful APIs using React, Node.js, Express, and MongoDB.
· I also deployed the application and handled environment configuration for production.

EDUCATION

Full Stack Web Development

Minor in N/A · Dice Academy Institute, Delhi · Tilak Nagar, New Delhi, India · 2024 – 2025 · N/A
· · Completed Frontend Development using HTML, CSS, JavaScript, React
· · Completed Backend Development using Node.js, Express.js, MongoDB
· · Built a Full Stack E-commerce Project with authentication and CRUD features
· · Familiar with REST APIs, Git, GitHub

SKILLS

HTML, CSS, JavaScript, React, Redux, Responsive Design

Node.js, Express.js, REST API

MongoDB, Mongoose

Git, GitHub, VS Code, Postman

Problem Solving, Debugging, API Integration, Hindi, English
